

Interview Study: Behaviours that Challenge in *SATB2*-associated syndrome

Researchers at Aston University are conducting an interview study that aims to find out more about behaviours that challenge in *SATB2*-associated syndrome.

We would like to invite parents or carers of a child or adult with *SATB2*-associated syndrome to complete an interview about behaviours shown by their child or the person they care for. We would also like to ask parents or carers to complete a couple of questionnaires about their child or person they care for. From previous work that we have conducted, we have identified that aggression is prevalent in *SATB2*-associated syndrome. Therefore, we are particularly interested in talking to parents or carers whose child or person they care for shows behaviours that challenge such as causing harm to themselves, other people, or objects. However, we would also like to speak to parents or carers about other behaviours that may be of concern. If your child or person you care for does not show behaviours such as those mentioned above, then we would still like to hear from you.

It is hoped that this research will help us to better understand the factors that are associated with behaviours that challenge in *SATB2*-associated syndrome.

Interested in taking part or finding out more?

You can do so in the following ways:

- 1) Complete an online expression of interest form using the link below, and a member of the research team will contact you to provide more information.

Link to online expression of interest form:

<https://tinyurl.com/SASInterviewStudyEOI>

- 2) **Contact the research team to register your interest or request a paper copy of the questionnaire:** Lauren Shelley (shelle1@aston.ac.uk, or 0121 204 3203) or Dr Jane Waite (j.waite@aston.ac.uk, or 0121 204 4307). A member of the research team will then contact you to provide more information.

Registering an interest does not commit you to taking part. You will have a chance to make your decision about getting involved once you have read the information sheets.
